

LAST MINUTE CHANGES

MONDAY 20/06/2022

1) 10:00-11:00 Robust Statistics I

10:40 Usefulness of the square-root allocation rule for many-to-one comparisons under non-normality (*moved from Robust Statistics II*)
Markus Neuhaeuser

2) 13:30 – 15:30 New directions in Bayesian nonparametric modelling

Cancelled --14:30 Compound vectors of subordinators and their associated positive Lévy copulas
Fabrizio Leisen, Alan Riva Palacio

3) 13:30 – 15:30 Inference for Complex Problem Settings

Cancelled -- 15:00 Sufficient Variable Selection via Expected Conditional Hilbert-Schmidt Independence Criterion
Chenlu (Tracy) Ke

4) 16:00 – 18:00 Statistical analysis of non-Euclidean and high-dimensional data

Cancelled --16:30 - Antipodal Refection Depth (ARD) for Multivariate and Functional Data & Nonparametric Outlier Detection
Regina Liu

TUESDAY 21/06/2022

1) 09:00 – 11:00 Semiparametric models

Cancelled --9:30 Some recent results on semiparametric transformation models
Natalie Neumeier

2) 16:00 – 18:00 New nonparametric and semiparametric methods on learning data with complex structures

Cancelled -- 16:00 Confidence sets for Causal Discovery
Mladen Kolar

3) 13:30 – 15:30 Nonparametric approaches in Econometrics

Cancelled -- 15:00 Estimation of Group Structures in Individual Fixed Effects Models
Enno Mammen, Ralf Wilke, Kristina Zapp

THURSDAY 23/06/2022

1) 18:15 - 19:15 Poster Session – Room: Foyer

Additional Paper:
A model-based approach to density estimation in sup-norm
Guillaume Maillard

2) 16:00 - 18:00 Extremes and Machine Learning

Additional Paper:
17:30 Cross validation for rare events.
Anass Aghbalou

3) 16:00 - 18:00 Extremes and Machine Learning

Cancelled -- Extreme conditional expectile estimation in heavy-tailed heteroscedastic regression models
Gilles Stupfler, Stéphane Girard, Antoine Usseglio-Carleve

FRIDAY 24/06/2022

1) 10:00 – 11:00 Robust Statistics II

10:20 Robust estimation in finite state space hidden Markov models
Alexandre Lecestre (moved from Robust Statistics I)

2) 10:00 – 11:00 Survival analysis II

Cancelled -- 10:40 A Goodness-of-fit Test with Length-biased Data
Ali Shariati, Vahid Fakoore, Mahboobeh Akbari
